Abhinav Srivastava
Booking ID : 17652600512

Siemens Atellica IM 1600

Siemens Healthineers : Siemens Atellica IM 1600

Department - Immunology

No. of test(s) performed - 3

Performed Test(s): *Thyroid Profile-Total (T3, T4 & TSH Ultra-sensitive)*

Description: The Siemens Healthineers system manufactured in Germany, combines AI-powered intelligent automation with advanced digitization to enhance performance and workflow efficiency. Utilizing acridinium ester-based chemiluminescence technology, it delivers highly sensitive and specific testing. With a throughput of up to 440 tests per hour and extensive automation, the system reduces manual handling, minimizes human error, and ensures reliable results for laboratories.

Frequency of Quality Control (QC) : 3 times a day (Industry best and as per NABL guidelines)

Biorad D100

Bio-Rad : Biorad D100

Department - BIOCHEMISTRY HBA1C

No. of test(s) performed - 2

Performed Test(s): *HbA1c*

Description: The Bio-Rad fully automated HPLC-based HbA1c analyzer manufactured in USA is a gold-standard system for accurate HbA1c testing. It is NGSP certified, IFCC traceable, and unaffected by common haemoglobin variants, ensuring highly reliable results.

Frequency of Quality Control (QC) : Twice a day (Industry best and as per NABL guidelines)

Report Summary

Abhinav Srivastava
Booking ID 17652600512 | Sample Collection Date: 05/Apr/2026

Understanding laboratory reports can be complex, often leading to unwarranted anxiety.
At Healthians, we understand that you shouldn't have to rely on a Google search to decipher your own health report. That's why we offer comprehensive summaries that are easy to understand.

Here is a summary and suggestions regarding your recent health test results:

Summary of Deranged Parameters

It appears that one of your thyroid hormone levels is a bit lower than the typical range. This can sometimes happen and doesn't necessarily mean there's a significant issue, but it's good that we're looking into it. Many factors can influence these levels, and often they can be managed effectively. We'll focus on understanding what this might mean for you and how we can best support your well-being.

Suggestions for Deranged Parameters

1.
Gentle Lifestyle Adjustments:
Consider incorporating regular, moderate physical activity into your routine. This could include brisk walking, swimming, or cycling. Aim for consistency rather than intensity.
2.
Nutritional Focus:
Ensure your diet is well-balanced and rich in essential nutrients. Paying attention to adequate intake of iodine, selenium, and zinc can be beneficial for thyroid function.
3.
Stress Management Techniques:
Explore practices that help you relax and manage stress, such as mindfulness, deep breathing exercises, or gentle yoga. Finding healthy ways to cope with daily pressures can have a positive impact.
4.
Adequate Rest:
Prioritize getting enough quality sleep each night. Aim for 7-9 hours of restful sleep to allow your body to repair and rejuvenate.

DEPARTMENT OF BIOCHEMISTRY HBA1C

Test Name	Value	Unit	Bio. Ref Interval
HbA1c - Glycosylated Hemoglobin			
Hba1c (Glycosylated Hemoglobin) Method: HPLC Machine: BIORAD D100	5.20	%	4.2 - 5.7
Average Estimated Glucose - plasma Method: Calculated	102.54	mg/dl	

INTERPRETATION:

AS PER AMERICAN DIABETES ASSOCIATION (ADA):		
REFERENCE GROUP	**GLYCOSYLATED HEMOGLOBIN (HBA1c) in %**	
Non diabetic	<5.7	
At Risk (Prediabetes)	5.7 – 6.4	
Diagnosing Diabetes	>= 6.5	
	Age > 19 Years	
	Goals of Therapy:	< 7.0
	Actions Suggested:	>8.0
Therapeutic goals for glycemic control	**Age < 19 Years**	
	Goal of therapy:	<7.5

REMARKS

1. HbA1c is used for monitoring diabetic control. It reflects the mean plasma glucose over three months
2. HbA1c may be falsely low in diabetics with hemolytic disease. In these individuals a plasma fructosamine level may be used which evaluates diabetes over 15 days.
3. Inappropriately low HbA1c values may be reported due to hemolysis, recent blood transfusion, acute blood loss, hypertriglyceridemia, chronic liver disease. Drugs like dapsone, ribavirin, antiretroviral drugs, trimethoprim, may also cause interference with estimation of HbA1c, causing falsely low values.
4. HbA1c may be increased in patients with polycythemia or post-splenectomy.
5. Inappropriately higher values of HbA1c may be caused due to iron deficiency, vitamin B12 deficiency, alcohol intake, uremia, hyperbilirubinemia and large doses of aspirin.
6. Trends in HbA1c are a better indicator of diabetic control than a solitary test. 7. Any sample with >15% HbA1c should be suspected of having a hemoglobin variant, especially in a non-diabetic patient. Similarly, below 4% should prompt additional studies to determine the possible presence of variant hemoglobin.
8. HbA1c target in pregnancy is to attain level <6 % .
9. HbA1c target in paediatric age group is to attain level < 7.5 %.

Method : Ion-exchange high-performance liquid chromatography (HPLC).

Reference : American Diabetes Associations. Standards of Medical Care in Diabetes 2023

10.The presence of some hemoglobinopathies/hemoglobin variants may be missed by some platforms used for measuring HbA1c values. In these cases, the HbA1c result may vary or give deviant results, depending on the platform used. Alternative measures of glycemic control like fructosamine or glycated albumin may be considered in such cases.

11.In presence of hemoglobinopathy/hemoglobin variants in homozygous/compound heterozygous conditions alternative forms of testing such as fructosamine or glycated albumin may be considered.

DEPARTMENT OF IMMUNOLOGY

Test Name	Value	Unit	Bio. Ref Interval
Thyroid Profile (Total T3,T4, TSH)			
Tri-Iodothyronine (T3, Total) Method: CLIA Machine: Siemens Atellica IM1300	1.34	ng/ml	0.60-1.81
Thyroxine (T4, Total) Method: CLIA Machine: Siemens Atellica IM1300	11.70	ug/dl	3.2-12.6
Thyroid Stimulating Hormone (TSH)-Ultrasensitive Method: CLIA Machine: Siemens Atellica IM1300	**0.444**	µIU/ml	0.55-4.78

Kindly Correlate Clinically.

Pregnancy interval	Bio Ref Range for TSH in uIU/ml (As per American Thyroid Association)
First trimester	0.1 - 2.5
Second trimester	0.2 – 3.0
Third trimester	0.3 – 3.0

Healthians recommends that the following potential sources of variation should be considered while interpreting thyroid hormone results:

1. Thyroid hormones undergo rhythmic variation within the body this is called circadian variation in TSH secretion: Peak levels are seen between 2-4 AM. Minimum levels seen between 6-10 AM. This variation may be as much as 50% thus, influence of sampling time needs to be considered for clinical interpretation.
2. Circulating forms of T3 and T4 are mostly reversibly bound with Thyroxine binding globulins (TBG), and to a lesser extent with albumin and Thyroid binding Pre-Albumin. Thus the conditions in which TBG and protein levels alter such as chronic liver disorders, pregnancy, excess of estrogens, androgens, anabolic steroids and glucocorticoids may cause misleading total T3, total T4 and TSH interpretations.
3. Total T3 and T4 levels are seen to have physiological rise during pregnancy and in patients on steroid treatment.
4. T4 may be normal even in the presence of hyperthyroidism under the following conditions : T3 thyrotoxicosis, Hypoproteinemia related reduced binding, during intake of certain drugs (eg Phenytoin, Salicylates etc)
5. Neonates and infants have higher levels of T4 due to increased concentration of TBG
6. TSH levels may be normal in central hypothyroidism, recent rapid correction of hypothyroidism or hyperthyroidism, pregnancy, phenytoin therapy etc.
7. TSH values of <0.03 uIU/mL must be clinically correlated to evaluate the presence of a rare TSH variant in certain individuals which is undetectable by conventional methods.
8. Presence of Autoimmune disorders may lead to spurious results of thyroid hormones.
9. Various drugs influence the levels of thyroid hormones such as L-Dopa, Lithium, Glucocorticoids, Phenytoin etc.
10. Healthians recommends evaluation of unbound fractions, that is free T3 (fT3) and free T4 (fT4) for clinic-pathologic correlation, as these are the metabolically active forms.

SIN No:E4940066

Terms & Conditions:

1) Machine Data is available for last 7 days only. In case of manual testing & outsourced testing, machine data will not be available.
2) CBC parameters may vary when it is manually reviewed by the Pathologists.
3) **For Thyroid tests** - Circulating TSH shows a normal circadian rhythm with a peak between 11pm-5am and a nadir between 5pm-8pm. TSH values are also lowered after food when compared to fasting in a statistically significant manner. This variation is of the order of ±50%, hence time of day and fasting status have influence on the reported TSH level.
4) **For Lipid profile** - Lipid and Lipoprotein concentrations vary during the normal course of daily activity. Also, certain drugs, diet and alcohol can have lasting effects on Triglyceride levels. To obtain best results for Lipid testing, a strict fasting of 10-12 hours with a light meal on the previous night is recommended.
5) Test results released pertain to the specimen submitted.
6) Test results are dependent on the quality of the sample received by the Lab.
7) The tests are carried out in the lab with the presumption that the specimen belongs to the patient named or identified in the bill/test request form/booking ID.
8) The reported results are for information and are subject to confirmation and interpretation by the referring doctor to co-relate clinically.
9) Test results may show interlaboratory variations.
10) Liability of Healthians for deficiency of services or other errors and omissions shall be limited to the fee paid by the patient for the relevant laboratory services.
11) This report is not subject to use for any medico-legal purposes.
12) Few of the tests might be outsourced to partner labs as and when required.
13) This report is not intended to replace but to lead by providing comprehensive information. It is recommended that you consult your doctor/physician for interpretation of results.
14) All reports might not be applicable for individuals less than 18, pregnant women or individuals suffering from diseases for which health test has not been performed or symptoms not diagnosed.
15) This report is based on preventive health test screening and is meant for a healthy lifestyle. It does not provide any recommendation for life threatening situations.
16) It is strongly recommended to take required precautions for allergic reactions or sensitivities.
17) Authorised partner labs as mentioned for certain tests are as below:
    HL/PL/001- Metropolis Healthcare Ltd
    HL/PL/002- Thyrocare technologies Limited
    HL/PL/003- Lifecell International Pvt. Ltd. - Laboratory Services
    HL/PL/004- Modern Diagnostic & Research Centre

As per your test results, We would recommend you to regularly take preventive health checkups for well-being.

HEALTH ADVISORY

Suggestions for Health & Well-being

Abhinav Srivastava
Booking ID : 17652600512 | Sample Collection Date : 05/Apr/2026

PHYSICAL
ACTIVITY

PHYSICAL ACTIVITY

Physical activities can vary from Regular walks (Brisk or normal), Jogging , Sports, Stretching, Yoga to light weight lifting etc. It is recommended to partake in physical activity at least 30 minutes a day for 3-4 days a week.
If regular workout is difficult, then we can adapt changes such as using stairs instead of lift/escalators and doing household work!

BALANCED DIET

A balanced diet is the key to healthy lifestyle. Include Whole grains, vegetables, whole fruits, nuts, seeds, beans, plant oils in your diet.
It is recommended to always have a high protein breakfast and a light dinner. Avoid items such as processed foods, potatoes and high calorie/sugar products. Don't forget to drink water regularly!

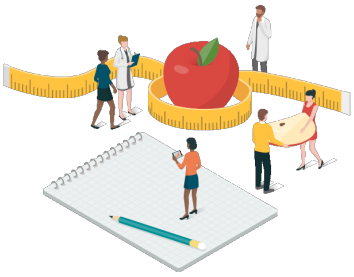

BALANCED
DIET

STRESS
MANAGEMENT

STRESS MANAGEMENT

Managing stress is an essential part of well-being. Some day to day changes can help such as having sufficient sleep (6-8 hours), indulging yourself in meditation, positive attitude towards lifestyle, using humor, traveling, talking to people whom you feel comfortable with and making time for hobbies by doing what you love to do.

BMI

BMI recommended range is 18.5 to 24.9. Your BMI is **29.35**, which is on a higher side.
Please follow recommended diet and maintain a healthy lifestyle and try to keep your BMI within the desired range. Keeping the right BMI for your body helps prevent many untimely diseases and goes a long way.

BMI CHART

UNDERWEIGHT	NORMAL	OVERWEIGHT	OBESE
Less than 18.5	Between 18.5 - 24.9	Between 25.0 - 29.9	More than 30

SUGGESTED

Supplement Suggestions

Abhinav Srivastava
Booking ID : 17652600512 | Sample Collection Date : 05/Apr/2026

Your test report has indicated that you have certain deficiencies in your body which may hamper your health & wellbeing in the longer run.

In order to fulfill the gaps in nutrition and promote a healthier body we suggest you the following supplements mentioned below:

Deficiency/Out of Range Parameter(s)	Suggested Supplement
TSH Ultra - Sensitive	THYRO FIX

To order, call 1800-572-000-4

Suggestions for Improving Deficiencies

100% NATURAL | HIGH QUALITY HERBS | NO SIDE EFFECTS

THYRO FIX

Here's nature's way to improve your thyroid function.

THYRO-FIX is a scientifically formulated and clinically proven all-natural supplement that helps strike the optimum balance of your thyroid levels. Whether hyperthyroidism or hypothyroidism, this ayurvedic supplement keeps your thyroid balanced and optimally functioning. Take the all-natural road to a healthy thyroid with THYRO-FIX.

Be it hyperthyroidism or hypothyroidism, untreated thyroid conditions can cause serious health issues, such as:

• Cardiovascular Diseases | • Brittle Bones | • Eye Issues | • Infertility | • Mental Health Concerns

Infused with the ages-proven goodness of all-natural ingredients, THYRO-FIX is the perfect supplement to promote and maintain good thyroid health, without having to worry about side effects. Sourced from nature's own pharmacy of herbs, the ingredients in THYRO-FIX present the following benefits:

Arjun Tree Extract
Decreases thyroid levels in hyperthyroidism to maintain hormonal balance

Ashwagandha
Increases thyroid levels in hypothyroidism to maintain hormonal balance

Anantmool
Anti-inflammatory & anti-oxidant properties reduce the symptoms of thyroid disorder

Asparagus
Regulates blood sugar levels & promotes heart health

IMMUNO-PLUS

Give your immunity a boost the all-natural way.

IMMUNO-PLUS is the perfect all-natural herbal supplement to boost your immune system and strengthens your body's defenses against diseases and infections.IMMUNO-PLUS provides your immune system the necessary reinforcement to keep you safe and healthy.

A weakened immune system opens you to a host of illnesses, such as:

• Recurring Infections | • Heightened Risk of Cancer | • Autoimmune Disorders | • Slow Growth Rate | • Serious Damage to the Heart, Lungs, Digestive Tract & the Nervous System

Infused with the ages-proven goodness of all-natural ingredients, IMMUNO-PLUS is the perfect supplement to strengthen your immune system without having to worry about side effects. Sourced from nature's own pharmacy of herbs, the ingredients in IMMUNO-PLUS present the following benefits:

Amla
Boosts immunity & Stores antioxidants

Jetwatika
Antioxidant properties strengthen the immune system

Aloe Vera
Fights against oxygenated rogue molecules in the blood

Ashwagandha
Reinforces the immune system to increase its fighting ability

Ginger
Anti-inflammatory & antioxidant effects reinforce the immune system
