Understanding laboratory reports can be complex, often leading to unwarranted anxiety.
At Healthians, we understand that you shouldn't have to rely on a Google search to decipher your own health report. That's why we offer comprehensive summaries that are easy to understand.

Patient Report Summary

Dear Abhinav,

Thank you for sharing your recent health test results. It's important to remember that test values can fluctuate for various reasons, and it's perfectly normal to have some parameters that are outside the typical range.

In your case, one of the values indicates a slightly elevated level that can be associated with various lifestyle factors. This is a common occurrence and can often be addressed through simple adjustments to your daily routine.

Here are some suggestions to help you manage this parameter effectively:

1. **Dietary Adjustments**
: Incorporating more fruits, vegetables, and whole grains into your meals can be beneficial. Foods rich in B vitamins, such as leafy greens, legumes, and nuts, may also support healthy levels.

2. **Regular Physical Activity**
: Engaging in regular exercise can have a positive impact on your overall health. Aim for at least 150 minutes of moderate aerobic activity each week, along with strength training exercises.

3. **Stress Management**
: Practicing relaxation techniques such as mindfulness, yoga, or meditation can help reduce stress, which in turn may positively influence your health.

4. **Routine Check-ups**
: Keeping up with regular health check-ups can help monitor your progress and ensure that you are on the right track.

Remember, small changes can make a significant difference over time. Focus on your overall well-being, and take one step at a time. You are on a journey towards better health, and every effort counts.

DEPARTMENT OF BIOCHEMISTRY

Basic Cardiac Addon Package

Test Name	Value	Unit	Bio. Ref Interval
hs CRP (C-Reactive Protein high sensitive)			
HS-CRP (HIGH SENSITIVITY C-REACTIVE PROTEIN) Method: Latex Particle Immunoturbidimetry Machine: SIEMENS ADVIA 2400	1.31	mg/L	Healthy Individuals:- <=3 mg/L Low Risk <1 mg/L Average Risk >1 and <3 mg/L High Risk >3 mg/L

High sensitivity C-reactive protein, when used in conjunction with other clinical laboratory evaluation of acute coronary syndromes, may be useful as an independent marker of prognosis for recurrent events in patients with stable coronary disease or acute coronary syndrome. Hs-CRP levels should not be substituted for assessment of traditional cardiovascular risk factors. Patients with persistently unexplained, marked evaluation of hs-CRP after repeated testing should be evaluated for non-cardiovascular etiologies.

Clinical significance :

Hs-CRP measurements may be used as an independent risk marker for the identification of individuals at risk for future cardiovascular disease. Elevated CRP values may be indicative of prognosis of individuals with acute coronary syndromes, and may be useful in the management of such individuals.

DEPARTMENT OF IMMUNOLOGY

Basic Cardiac Addon Package

Test Name	Value	Unit	Bio. Ref Interval
Homocysteine			
HOMOCYSTEINE	**15.65**	µmol/L	3.7-13.9

Method: CLIA
Machine: SIEMENS CENTAUR XP

Homocysteine is a thiol containing amino acid ,produced by intracellular demethylation of methionine to cysteine. Elevated Homocysteine has primary atherogenic and prothrombotic properties

Use

- Elevated Homocysteine levels may be used to exclude or confirm deficiencies of vitamin B 12 or folate
- Elevations in Homocysteine levels have also been used as an independent risk factor of coronary or cerebral vascular disease

Increased in

- Vitamin B12, Vitamin B 6 or folate deficiency
- Hypothyroidism
- Chronic renal failure
- Coronary heart disease

Decreased in

- Down syndrome
- Pregnancy
- Hyperthyroidism
- Early diabetes

DEPARTMENT OF IMMUNOLOGY

Test Name	Value	Unit	Bio. Ref Interval
Thyroid Profile (Total T3,T4, TSH)			
Tri-Iodothyronine (T3, Total) Method: CLIA Machine: SIEMENS CENTAUR XP	0.81	ng/ml	0.60-1.81
Thyroxine (T4, Total) Method: CLIA Machine: SIEMENS CENTAUR XP	10.20	ug/dl	3.2-12.6
Thyroid Stimulating Hormone (TSH)-Ultrasensitive Method: CLIA Machine: SIEMENS CENTAUR XP	1.377	µIU/ml	0.55-4.78

Pregnancy interval	Bio Ref Range for TSH in uIU/ml (As per American Thyroid Association)
First trimester	0.1 - 2.5
Second trimester	0.2 – 3.0
Third trimester	0.3 – 3.0

Healthians recommends that the following potential sources of variation should be considered while interpreting thyroid hormone results:
1. Thyroid hormones undergo rhythmic variation within the body this is called circadian variation in TSH secretion: Peak levels are seen between 2-4 AM. Minimum levels seen between 6-10 AM. This variation may be as much as 50% thus, influence of sampling time needs to be considered for clinical interpretation.
2. Circulating forms of T3 and T4 are mostly reversibly bound with Thyroxine binding globulins (TBG), and to a lesser extent with albumin and Thyroid binding Pre-Albumin. Thus the conditions in which TBG and protein levels alter such as chronic liver disorders, pregnancy, excess of estrogens, androgens, anabolic steroids and glucocorticoids may cause misleading total T3, total T4 and TSH interpretations.
3. Total T3 and T4 levels are seen to have physiological rise during pregnancy and in patients on steroid treatment.
4. T4 may be normal even in the presence of hyperthyroidism under the following conditions : T3 thyrotoxicosis, Hypoproteinemia related reduced binding, during intake of certain drugs (eg Phenytoin, Salicylates etc)
5. Neonates and infants have higher levels of T4 due to increased concentration of TBG
6. TSH levels may be normal in central hypothyroidism, recent rapid correction of hypothyroidism or hyperthyroidism, pregnancy, phenytoin therapy etc.
7. TSH values of <0.03 uIU/mL must be clinically correlated to evaluate the presence of a rare TSH variant in certain individuals which is undetectable by conventional methods.
8. Presence of Autoimmune disorders may lead to spurious results of thyroid hormones.
9. Various drugs influence the levels of thyroid hormones such as L-Dopa, Lithium, Glucocorticoids, Phenytoin etc.
10. Healthians recommends evaluation of unbound fractions, that is free T3 (fT3) and free T4 (fT4) for clinic-pathologic correlation, as these are the metabolically active forms.

Terms & Conditions:

1) Machine Data is available for last 7 days only. In case of manual testing & outsourced testing, machine data will not be available.
2) CBC parameters may vary when it is manually reviewed by the Pathologists.
3) **For Thyroid tests** - Circulating TSH shows a normal circadian rhythm with a peak between 11pm-5am and a nadir between 5pm-8pm. TSH values are also lowered after food when compared to fasting in a statistically significant manner. This variation is of the order of ±50%, hence time of day and fasting status have influence on the reported TSH level.
4) **For Lipid profile** - Lipid and Lipoprotein concentrations vary during the normal course of daily activity. Also, certain drugs, diet and alcohol can have lasting effects on Triglyceride levels. To obtain best results for Lipid testing, a strict fasting of 10-12 hours with a light meal on the previous night is recommended.
5) Test results released pertain to the specimen submitted.
6) Test results are dependent on the quality of the sample received by the Lab.
7) The tests are carried out in the lab with the presumption that the specimen belongs to the patient named or identified in the bill/test request form/booking ID.
8) The reported results are for information and are subject to confirmation and interpretation by the referring doctor to co-relate clinically.
9) Test results may show interlaboratory variations.
10) Liability of Healthians for deficiency of services or other errors and omissions shall be limited to the fee paid by the patient for the relevant laboratory services.
11) This report is not subject to use for any medico-legal purposes.
12) Few of the tests might be outsourced to partner labs as and when required.
13) This report is not intended to replace but to lead by providing comprehensive information. It is recommended that you consult your doctor/physician for interpretation of results.
14) All reports might not be applicable for individuals less than 18, pregnant women or individuals suffering from diseases for which health test has not been performed or symptoms not diagnosed.
15) This report is based on preventive health test screening and is meant for a healthy lifestyle. It does not provide any recommendation for life threatening situations.
16) It is strongly recommended to take required precautions for allergic reactions or sensitivities.
17) Authorised partner labs as mentioned for certain tests are as below:
    HL/PL/001- Metropolis Healthcare Ltd
    HL/PL/002- Thyrocare technologies Limited
    HL/PL/003- Lifecell International Pvt. Ltd. - Laboratory Services
    HL/PL/004- Modern Diagnostic & Research Centre

As per your test results, We would recommend you to regularly take preventive health checkups for well-being.

HEALTH ADVISORY

Suggestions for Health & Well-being

Abhinav Srivastava
Booking ID : 13685991213 | Sample Collection Date : 13/May/2025

PHYSICAL
ACTIVITY

PHYSICAL ACTIVITY

Physical activities can vary from Regular walks (Brisk or normal), Jogging , Sports, Stretching, Yoga to light weight lifting etc. It is recommended to partake in physical activity at least 30 minutes a day for 3-4 days a week.
If regular workout is difficult, then we can adapt changes such as using stairs instead of lift/escalators and doing household work!

BALANCED DIET

A balanced diet is the key to healthy lifestyle. Include Whole grains, vegetables, whole fruits, nuts, seeds, beans, plant oils in your diet.
It is recommended to always have a high protein breakfast and a light dinner. Avoid items such as processed foods, potatoes and high calorie/sugar products. Don't forget to drink water regularly!

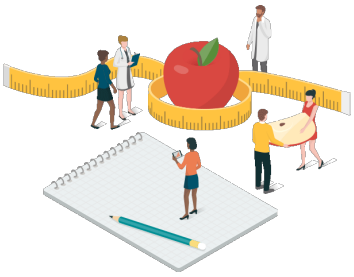

BALANCED
DIET

STRESS
MANAGEMENT

STRESS MANAGEMENT

Managing stress is an essential part of well-being. Some day to day changes can help such as having sufficient sleep (6-8 hours), indulging yourself in meditation, positive attitude towards lifestyle, using humor, traveling, talking to people whom you feel comfortable with and making time for hobbies by doing what you love to do.

BMI

BMI recommended range is 18.5 to 24.9. Your BMI is **30.11**, which is on a higher side.
Please follow recommended diet and maintain a healthy lifestyle and try to keep your BMI within the desired range. Keeping the right BMI for your body helps prevent many untimely diseases and goes a long way.

BMI CHART

UNDERWEIGHT	NORMAL	OVERWEIGHT	OBESE
Less than 18.5	Between 18.5 - 24.9	Between 25.0 - 29.9	More than 30

Supplement Suggestions

Abhinav Srivastava
Booking ID : 13685991213 | Sample Collection Date : 13/May/2025

In order to fulfill the gaps in nutrition and promote a healthier body we suggest you the following supplements mentioned in the table below:

Suggestions for Improving Deficiencies

IMMUNO-PLUS

Give your immunity a boost the all-natural way.

IMMUNO-PLUS is the perfect all-natural herbal supplement to boost your immune system and strengthens your body's defenses against diseases and infections.IMMUNO-PLUS provides your immune system the necessary reinforcement to keep you safe and healthy.

A weakened immune system opens you to a host of illnesses, such as:

• Recurring Infections | • Heightened Risk of Cancer | • Autoimmune Disorders | • Slow Growth Rate | • Serious Damage to the Heart, Lungs, Digestive Tract & the Nervous System

Infused with the ages-proven goodness of all-natural ingredients, IMMUNO-PLUS is the perfect supplement to strengthen your immune system without having to worry about side effects. Sourced from nature's own pharmacy of herbs, the ingredients in IMMUNO-PLUS present the following benefits:

Amla	Jetwatika	Aloe Vera	Ashwagandha	Ginger
Boosts immunity & Stores antioxidants	Antioxidant properties strengthen the immune system	Fights against oxygenated rogue molecules in the blood	Reinforces the immune system to increase its fighting ability	Anti-inflammatory & antioxidant effects reinforce the immune system

NUTRI-BOOST

Make-up for your missing nutrition the all-natural way!

NUTRI-BOOST is a scientifically formulated and clinically proven all-natural supplement that provides you with essential nutrients that might be missing from your daily diet. With NUTRI-BOOST, give your body the richness of all-natural nutrients and get all the energy you need to keep active throughout the day.

A lack of essential nutrients can lead to serious deficiencies which lead to serious health consequences. Some of the common deficiencies include:

• Iron Deficiency | • Iodine Deficiency | • Vitamin D Deficiency | • Calcium Deficiency | • Vitamin B12 deficiency

Infused with the ages-proven goodness of all-natural ingredients, NUTRI-BOOST is the perfect supplement to fill in the gap of vital nutrients for your body, without having to worry about side effects. Sourced from nature's own pharmacy of herbs, the ingredients in NUTRI-BOOST present the following benefits:

Indian Khajoor	Shatavari	Amla	Wheat	Jetwatika
Promotes brain and heart health	Anti-oxidant properties boost the immune system.	Aids in digestion, and promotes heart & liver health	Aids in weight control reduces the risk of heart ailments and provides energy	Prevents cell damage to keep optimum body functionality
